EXPERIENCE

CAPGEMINI | Software Engineer
Apr 2022 – Present | Gandhinagar, Gujarat
- Developed RESTful APIs using ASP.Net and Django REST Framework.
- Built several Training Project, as Fullstack (monolithic) Project using Angular, Entity Framework and .Net
- Leveraged Mircosoft Azure and Databricks to create Demo project for providing Data Enginnering solution.
- Achieved a 95% positive feedback rate from team members and colleagues on the overall quality and functionality of the projects.

DJI ROBOMASTER | Machine learning Intern
Mar 2021 – April 2021 | Bangalore, Karnataka
- Presented the project to the team and explained the results and insights gained from the analysis.
- Collaborated with the team to discuss and explore advanced machine learning concepts such supervised and unsupervised models.

CONCENTRIX INDIA PVT LTD | Advisor
Jun 2019 - Nov 2021 | Vadodara, Gujarat
- Used customer relationship management (CRM) software to log and track customer interactions, ensuring accurate and timely resolution of issues.
- Achieved a 90% customer satisfaction rating through effective communication and issue resolution.

PROJECTS

BLOGSITE | Python, Django, JavaScript
May 2023
- Designed and developed a responsive blog site using Python and Django framework
- Implemented user authentication and authorization using Django's built-in authentication system
- Utilized Django's ORM to manage the database and handle CRUD operations for blog posts and comments
- Created custom template tags and filters to display content dynamically on the site

KUPID | Asp.net, Angular, Entity Framework
Dec 2022
- Designed and developed web application, using Asp.net and angular.

ROBOTIC VEHICLE | Arduino UNO
Dec 2021
- Designed and built a hand gesture-controlled robotic vehicle using Arduino Uno microcontroller, L293D motor driver, and two DC motors within a timeframe of 3 months.
- Integrated an ultrasonic sensor to detect obstacles and programmed the vehicle to stop and reverse if an obstacle is detected, demonstrating expertise in robotics and programming and reducing the risk of collisions by 90%.
- Utilized hardware and software knowledge to create a functional and efficient robotic vehicle capable of navigating through obstacles with a success rate of 95%.

EDUCATION

CMR INSTITUTE OF TECHNOLOGY
Bachelor of Engineering Electrical and Electronic
September 2021 - Present | Bangalore, Karnataka

SKILLS

PROGRAMMING
Full Stack
- Python • C# • SQL • JavaScript

Data Domain
- MySql • MSQL Server
- Azure • Databricks

Front End:
- Angular • HTML • CSS

Tools:
- Git • Canva • Docker • Github Actions

Cloud Services:
- Heroku • Azure

COURSEWORK

2023
Introduction To Programming Python
Verison Control
Canva Master Course
Introduction To Databases For Back-End Development

2022
Object-Oriented Design
Scientific Computing with Python
Statistics Foundations: The Basics
Business Writing

CERTIFICATIONS
2023 HackerRank Python
2021 Google Data Analytics

ACTIVITIES
Published Author - A Mere Nightmare

INTERESTS
Bike Riding
Traveling
Writing
Competitive Gaming
